EDGE UTOPIA[®]

The Remarkable EdgeSequel Utopia™

The New EdgeSequel Utopia™ delivers a Technology-Enhanced Constant 02, 04, 06 Taper System with a Remarkably-Beautiful blue blade featuring our FireWire Blaze Blue heat treatment. Plus, we added our new ultra secure, Ultra-Fit handle and shank.

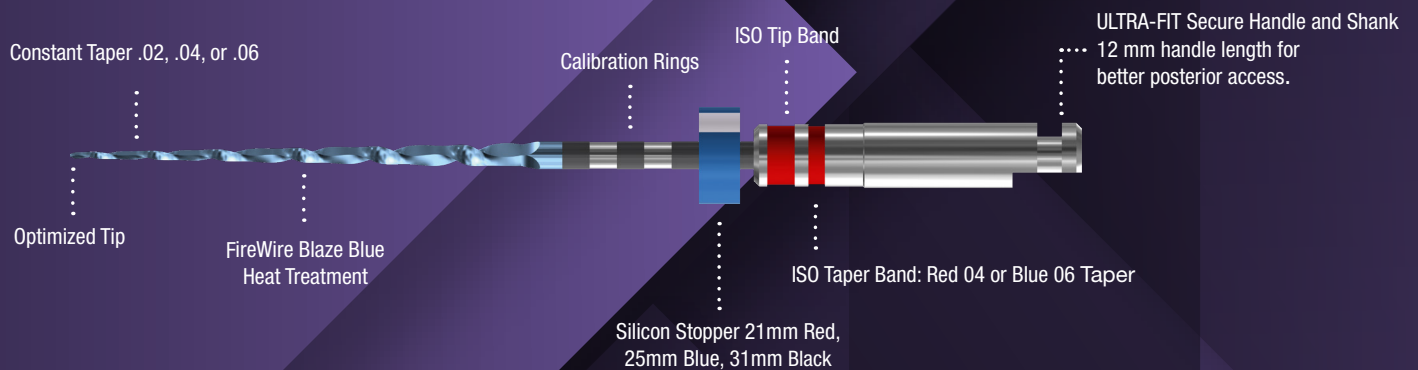

FireWire Blaze Blue

FireWire Blaze Blue is our newest proprietary heat treated NiTi. You will find that its flexibility, and feel provides unparalleled performance and shapes.

—It Is Truly, Amazing!

Pre-Sterilized

Triangular Cross Section

Available in 3 lengths: 21, 25 & 31 mm

Highly Flexible

No Bounce Back

High Strength

EDGESEQUEL UTOPIA™

Simplified Technique Guide

1. Create straight line access to canal orifices.
2. Locate canals and explore using stainless steel hand instruments. Minimum size #10K file to working length recommended prior to rotary file use.
3. Irrigate before each hand or rotary file.
4. Use #15/04 file in one or more passes, alternating with small-sized hand files if necessary, until working length is reached. If more coronal flare is desired it can be achieved by incorporating the EdgeGlidePath file used in a brushing motion.
5. Next use #25/04 to working length passively; if instrument has not reached working length use additional shaping instrument #20/04 to working length.
6. If #25/04 reached working length with minimal resistance or if clinician desires a larger apical shape additional instruments can be used (#30, #35, #40, etc).

*This technique is intended to be used as a guide only. Please see full IFU.

The New EdgeSequel Utopia™ is taking the original EdgeSequel Sapphire to the next level of performance, cutting ability and flexibility. We are also excited to introduce our incredible FireWire Blaze Blue NiTi along with our new ultra secure, Ultra-Fit handle and shank. This is our best EdgeSequel ever!

We know you will love the New EdgeSequel Utopia™!

EDGESEQUEL UTOPIA™

- Available in .02, .04 and .06 Constant Taper
 - Variable Pitch
 - Triangular Cross Section
 - Maximizes file cutting efficiency
 - Non-Cutting Tip
 - Reduced handle and shank length for increased posterior access
 - ISO tip size 15-50
 - Available lengths: 21, 25 & 31 mm
- FireWire Blaze Blue technology
 - Sterile Packaging
 - Utopia alternative to the EdgeSequel Sapphire™
 - Same technique as EdgeSequel Sapphire™
 - ULTRA-FIT Secure Handle and Shank
 - Spectacular FireWire Blue Blades
 - Pre-Sterilized
 - Free Shipping
